This line of heifers are very good to handle in the yards and paddock. They flow well and have had plenty of handling and education in both the yards and paddock. Only very odd heifer was unsettled when being pregtested, but as a mob they are good cattle to work.

Handled With	Aerial (Helicopters, gyro's and planes) , Bikes
Assessor Comments	102 Vet PTIC Angus, Brangus & Ultrablack heifers that are 3-5months to Jorabee Angus Bulls, all bulls are low birth sires for ease of calving. This mob of heifers are showing to be very fertile with only a 5 month joining and a 90% PTIC rate was achieved. The heifers were 426kg at assessment after being in the yards for 5 hours. The heifers are well framed and have very good body condition so will grow out to be good framed fertile breeders. The heifers were purchased as weaners from Western & Central Queensland and were grown out before being joined in late October 2021. The majority of this mob are straight black with a small % of brindle and white face heifers through the mob. They will be sold as a run out the gate of 204 hd. Please note odd heifer with blue eye scaring. 1 heifer with slight string-holt but is fit to travel. Delivery will need to be Tuesday 19th or Wednesday 20th due to clearing requirement Vendor has 4 lots in same sale all PTIC Heifers to Jorabee Angus Bulls.
