	Cattle were generally very good to handle in the yards and through the race and crush. Five steers became mildly agitated in and exiting the crush and two were highly agitated in the crush. They all settled quickly once back in the bigger yard. They are used to horses, side by sides and dogs. Educated to electric fences.

Assessor Comments	A mostly good to very good quality line of yard weaned Angus and Angus cross steers. They are medium to large frame and suit to background to heavy domestic feeder weights and then onto export feeder markets. After this property was purchased in 2021, these calves were purchased as part of various mobs of cow and calf units. They have been drafted on visual breed assessment rather than breeding history. These are the steers that appear as Angus x Angus or 75% Angus / 25% British cross. They were yard weaned on 19/03/22 and are educated to hay racks and electric fences. Two steers had a slight smokey blue eye in one eye and two with a slight BE spot in one eye. All weaners will be rechecked for any active pink eye prior to delivery. Three steers were late ringed on 19/03/22 and their scrotum has not fully fallen off yet but there are no issues. They are not showing SMSC. They had a LWR of 208-376 kg with a small tail removed. Please note heifers to make a B Double load.
