Assessor Comments	A line of 12 Angus heifers that are out of a large New England herd that has been supplying F1 progeny to top end Wagyu supply chain for a number of years. These heifers were part of the vendors keeper heifers for their F1 breeding operation and did not fall in calf on a tight 6 week joining. These heifers have been Pestiguard treated with a booster shot given and are up to date on 7-1. One heifer has a very small white patch on back of udder. Nice heifers that are well bred and surplus to vendors requirements
