|                    | Steers handled very well - drafting and through race and crush. With weaning and handling would expect steers to become very quiet. Cows show no signs of stirry behaviour while drafting.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |                                           |                                     |

| Assessor Comments  | A top quality line of Brangus/Angus steers. Steers are calves out of Stud Newcastle Waters. Angus/Brangus cows that were purchased PTIC. Well bred steers that show good growth and bone. Note: steers have an NLIS ear tag but are unbranded. 2 steers have minor hump. Steers worked very well through draft and crush. Being weaned since assessment. I have taken 5% delivery adjustment off weight of steers but buyers please make your own assessment of delivery weight. Maybe a small influence of Boran in some steers as heifers were joined to Boran bulls. Very good steers to take through to trade/export feeder weights or grow out to grass bullocks. Vendor has another 2 lots this sale (sisters to these steers) |                                           |                                     |
