Assessor Comments	56 - Very good quality EU accredited Vendor bred Angus heifers, 9 - 10 months of Age. Heifers present in healthy fresh forward condition. Heifers are an annual offering of weaners being bred from a reputable New England Angus cow herd. Heifers were weighed out 305kg & heavier with a lighter tail being removed at assessment. Heifers have been weaned for the past 6 weeks prior to assessment. The temperament of these heifers is a feature, evident of their management practices, being monitored & moved on a regular basis post weaning. 6 heifers were noted to have white udders/underbellies (Please see media for further reference). Most heifers are showing dagg on tails, apparent to the fresh pastures being grazed post weaning. Sale of heifers represents an annual production sale & an opportunity to secure a genuine line of Quality EU accredited 1 mark Angus heifers that would be an attribute to any breeding herd as replacement future breeding females.
