Comment on Fat Score 1 Cattle: All steers are fit and healthy and would have no concerns trucking long distance. fat score is minimal however this would not be considered unusual considering the quality of fresh green pasture in their diet.

Vendor Bred: Yes

Stock History: predominately out of a line of purchased Brahman cows in 2019 with good quality and medium frame. Vendors herd consists of Bungoona and Lyons Brahman and Riverglen and Ayr Charolais genetics

Lifetime Traceable: 100% of cattle in this lot are Lifetime Traceable

Bloodlines: Out of Charbray, Brahman and Brahman X Cows by Bungoona Brahman and River Glen and Ayr Charolais Genetics.

Grazing Conditions: A very good body of Green high growth Buffel, Mitchell and Flinders Grasses on semi-shaded pebbly downs and pulled gidgea and boree country.

Temperament

Yards	Crush	Paddock
Docile: 12 head Quiet: 70 head Slightly Stirry: 8 head	Docile: 6 head Quiet: 57 head Slightly Stirry: 12 head	Temperament not assessed in Paddock

steers have received a basic education as weaners and were typically good to handle through the yards. drafted through a pound draft before assessment and then through the race with minimal issues. Small percentage became slightly agitated in the headbail at weighing and mouthing with the odd steer becoming agitated in the pound. Majority walked in calmly and looked for a gate and lead through the race with no concerns.

Handled With	Aerial (Helicopters, gyro's and planes) , Bikes , Horses , On foot , Vehicles
Assessor Comments	A good line of young Brahman & Brahman Cross milk tooth yearling steers. well suited as backgrounders for live export or feedlots with plenty of softness about them. weaned and educated with plenty of potential these steers have the frame and room to continue moving forward to heavy feeders or grass bullocks. Good moderate to large frame, with tidy heads, good temperament and well handled. approx 50% of these steers are out of a mob of cows purchased in 2019, approx 50% genuine vendor bred steers heavily influenced by the highly regarded Bungoona bloodlines with Charolais genetics through the core breeding herd including River Glen & Ayr. approx 30% of these steers are considered flatback crossbred types predominately being Charbray/Charolais types. steers are showing slight roughness in the coat, predominately in the neck area indicating possible lice however buffalo flies were prevalent at assessment with 3 steers noted to have open bites on their neck.
