Good quiet weaners that settled well at weaning , a few that were a little fast initially have settled down well with some work through the yards.

Handled With	Bikes , Dogs , On foot
Assessor Comments	Quality weaners to take on and either background for all feeder descriptions or fatten . No lead has been taken out of these cattle, they are the total numbers out of a couple of paddocks. There are 8 young bulls that were kept as potential Sires, these are quality animals that could be cut or kept. These weaners were subjected to poor conditions when first weaned due to wet yards. They appear to be filling up and going very well since being let out of the yards. Some weaners with horns can be seen in the photos these cattle have been removed from the lot. To be offered pre-treated for clearing into clean country and delivered to Moura clearing dip.
