|--------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Assessor Comments  | Good line of 21 healthy dairy x steers, that do have bone and some shape. These steers have been very well reared and are now continuing to do well. They are docile and easy to handle. They have had their 2 vaccinations/drenched and were dehorned as calves. They have infusion of Ayrshire in their breeding which gives them more bone and fatten easier. They are principally all black, though some do have small amounts of white. Good quiet steers to tip out till the spring. All good in the eyes. |
