Assessor Comments	21 Soft One Mark AI Cross Breed heifers, weighing 429 – 504 kgs to avg 460.6 kgs full at assessment. Heifers are PTIC to Millah Murrah Nugget N266. Heifers present in forward store condition and have a good amount of condition on them with the stage of pregnancy they are at. Heifers have all been fetal aged by a vet on 04/05/22 showing them to be 5 to 5.5 months in calf & should calve down over a 10 day period with the AI program. Heifers are showing good depth, bone and growth for age. Heifers look to be developing into good quality future breeders. These Heifers would be ideal to take home calve down into a self-replacing herd operation or go into a trade operation. Heifers were purchased as weaners ex Taroom to be joined and kept on as future breeders. With a change in business direction, the heifers are now being sold PTIC. Please note this vendor has 6 lots in this sale.
