Comment on Fat Score 1 Cattle: Cattle that are 1 score are not out of step with cattle in the region and this time of year. The feed has certainly dried off with no forward performance. The cattle are strong and healthy and I do not expect any issues with long distance trucking with usual care and spelling.

These cattle handle very well. Like most cattle in our region some can become agitated under pressure or in the crush but these numbers were very small. Once exiting the crush they very quickly settled with the mob. Absolutely no aggression in these cattle.

Assessor Comments	A healthy group of heifers ready to rapidly go ahead on the right feed. They have good frame without excessive weight. Ideally set up to leap ahead. A real opportunity to capture the upside in a yard of heifers that should go away and perform very well. This group has not been treated with HGP. The vendor will truck to Sugar Bag on the 8th June to assist with easy delivery and clearing. The cattle will be pretreated with Maxilab. 3 other lots from this vendor in today's sale with the opportunity to put good loads together. 1 Heifer noted with healed fly scarring and 1 heifer with half tail - all dog bites were removed from the assessed group and are not included. 4 Brindles and 5 Black heifers included but certainly stand up for quality.
