Comment on Fat Score 1 Cattle Any score 1's are fit to travel any distances without any problems.

Vendor Bred Yes  
 Stock History Bred out of a good quality herd of Red Angus females.  
 Lifetime Traceable 100% of cattle in this lot are Lifetime Traceable  
 Bloodlines All by registered Red Angus bulls purchased ex: Anama (SA). The genetic gain from introduction of these sires is really starting to be noticed.

Grazing Conditions Bred in traprock country that has enjoyed a very good summer season and currently an excellent winter. Still in the weaning process being fed good quality oaten hay in the yards.  
 Returned to: Will remain in a holding paddock on very good feed until delivery.

Burr/Seed in Coat Noogoora burr on the head, in the coat and tail brush.

HGP Status The owner declares that the cattle have not been treated with HGP at any period of their lives  
 Health Treatments Vaccinated 20/02/2022 5 in 1 (at branding)  
 Chemical Residue Clear - No known history  
 Eligibilities Russian Eligible Saudi Eligible PCAS Eligible  
 J-BAS Score 6

Vendor Comments These are heifers that are surplus to requirements. Have not had a tough day since birth so no setback at any stage.

|                               | These have started to quieten down very well since weaning with all the bellowing for the cows pretty much gone. Most handled very easily at assessment through the crush & in the race however there were odd few that were a bit keen in the race. They have only been through the race once prior to assessment however they will receive further education prior to delivery. Very quiet out in the bigger yards when being photographed and videoed. They do respond well to bikes and dogs in the paddock.                                                                                                                                                                                    |                                           |                                     |
| Handled With                  | Bikes , Dogs                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |                                           |                                     |
| Assessor Comments             | Buyers, a small line of Red Angus heifers that are surplus to further breeding requirements. These will suit restockers to grow out and background for domestic feeder markets or grow out for future breeders. The hard work of breeding and weaning them has been done. Heifers very clean in the muzzle with no nasal discharge that is sometimes prevalent in weaners at this time of year and this indicates they are in good health. These bred on lighter country, history would suggest they will really hit their straps if they are exposed to crop or winter herbage. These have had no detrimental growth setback at any stage. They exhibit good softness, depth of barrel and length. |                                           |                                     |
