| Joining Access Details        | Been running with their sires whilst on their mothers. Would not consider any of these heifers old enough or heavy enough to have cycled.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |                                                                                  |                                           |     |                                     |      |                 |      |

| Assessor Comments             | Backgrounders and re-stockers here's a opportunity to buy Yard weaned Heifers that are Quiet, well bred and presented in genuine store condition ready to go ahead on harder feed. The wet summer & Autumn has presented this years offering with no Bloom. These heifers are suitable for Backgrounders and re-stockers. This line present with ample frame to put weight on quickly. They are out of predominately large framed good quality Angus & Hereford breeders. The lighter end of the heifers have been drafted off, no replacement breeders have been taken out so this is the proper lead of the "Kumbee" Heifers. 4 heifers noted to have old scarring in one eye at assessment, no active cases of blight or pink eye at assessment. These heifers will not disappoint, I recommend this line of heifers, this vendor also has a deck of steers in same sale. |                                                                                  |                                           |     |                                     |      |                 |      |
