| Assessor Comments  | 15 Heifers, Joined to Wagyu Bulls, that were PT not detectable on the 26.05.22, but were still running with the bulls right up until they were Preg Tested. Heifers have a good chance of being in calf under 5 weeks, although if you did not desire them joined to a Wagyu Bull, are early enough to be needled and aborted to join to the bull of your choice, or to background or to purchase as feeder heifers. Please see attachments for Bull Documents. Heifers Ranged from 290kg to 417kg, for an average projected delivery weight of 335kg. |                                           |                                        |
