	These heifers have been worked well with dogs, bikes and horses. They flowed through the yards well on assessment. These heifers were good to walk through when taking photos, with the odd heifer jogging off. Once singled off some would become unsettled but settled once back into the mob.							
Handled With	Bikes , Dogs , Horses							
Assessor Comments	A line of 90 No.1 EU Station mated Droughtmaster heifers, bred and grown on costal country. These heifers are predominately polled and are all n0.1s with 4 No.2 heifers in the mob. The heifers were weighed after a large curfew and are medium to large framed. Overall a great line of Droughtmaster future breeders. Please note the heifers were exposed to braford bulls for 12hours while in the yards drafting.
