	Steers worked well through the yards and crush considering it was there first time. Some steers became agitated in the crush but once released back into the mob they settled. steers moved freely in the yards and behaved typical of cattle just weaned. A continued weaning program by the purchaser would be very beneficial to the steers.

Assessor Comments	Buyers here is an opportunity to purchase a quality line of vendor bred Angus and Angus cross steers. These steers are ideal to put away on crop or grass and take through to heavier feeder weights. Please note two steers had a cloudy eye at time of assessment. Two steers had a red touch to their coat (see photos). Steers sold in the past are well known performers & are highly sort after by repeat buyers. Please note vendor also has another two lots of steers and one lot of heifers in the same sale. *Please note delivery dates*
