The Heifers behaved well throughout the assesment process. The cattle were settled in the yards, and were no trouble to walk around whilst taking photos.

Handled With	Aerial (Helicopters, gyro's and planes) , Bikes , Dogs
Assessor Comments	A good draft of young Station Bred Brangus Heifers, would suit to either feed or grow out to Breeders. The Vendors have used the best available Brangus genetics in their herd, and these represent an oportunity to secure a line of very good quaility Brangus Heifers. The Heifers include 4 heifers with a spotted Gur neck, 6 Heifers with residual fly bite marks, which are evident but no affect to the Heifers, which will heal with the recent back line application. One heifer with a short tail, approx. 1/3 in length, which was born with it, and not effecting the heifer. The Heifers were pre-treated with a Dectomax Pour on on the 27/06/2022.
