Comment on Fat Score 1 Cattle	All steers are fit and healthy and would have no concerns trucking long distance. Steers display an even light fat cover and are in forward condition as a result of mothers healthy milk production. Steers colours 100% grey
Vendor Bred	Yes
Stock History	Vendor bred steers, by Bungoona and Chatfield Brahman Bulls with Charolais influence through cow herd being predominately Ayr and River Glen bloodlines.
Lifetime Traceable	100% of cattle in this lot are Lifetime Traceable
Bloodlines	Out of Charbray, Brahman & Brahman X Cows. By Bungoona & Chatfield Brahman Bulls.
Grazing Conditions	Weaned off mothers from the 25th to the 27th. Have been on good quality Rhodes grass and Cow pea hay and tailed out until delivery. Returned same
Burr/Seed in Coat	No Burr or Seed of weeds declared noxious observed in the coats at assessment
HGP Status	Treated with compudose 400 day March
Chemical Residue	nil
J-BAS Score	6
Vendor Comments	Part of our annual turn off of weaner steers, these are the lead of our 1st round Brahman type weaners. The temperament

of these calves is exceptional for 1 day off cows in the yards. Normally these steers would be carried through to heavy feeders.

Steers have received some education however the last of them have only been weaned for 1 week by the expected delivery date. Given it was their first handling through the yards, they drafted in a pound draft and then through the race sensibly. A small percentage became slightly agitated on the scales at weighing however majority walked in and stood contently and waited for the gate to open. Temperament of the steers is exceptional given thy are only in the early phase of weaning training.

Assessor Comments STEER BACKGROUNDERS & BULLOCK FATTNERS TAKE NOTE OF THESE QUALITY VENDOR BRED, GREY BRAHMAN, WEANER STEERS. A very good line of Brahman. The quality of these steers is suited to southern feedlots with plenty of bone & softness about them. Steers are Large to moderate frame and display quality confirmation. These are Freshly weaned steers in forward condition however show plenty of growth potential, they are on a rising plane of nutrition and have over 250 days of HGP left to run! All display tidy heads and an excellent temperament. The mothers of these steers is heavily influenced by the highly regarded Bungoona bloodlines with Charolais genetics through the core breeding herd. Sired by Chatfield and Bungoona braman bulls. Assessed 1 to 5 days off mothers & handled very well through the draft and scales. 100% with hump steers all showing high Bos Indicus levels. All the hard work has been done for a purchaser to take advantage of growing these steers further.
