	Slightly Stirry: 4 head	Slightly Stirry: 6 head	Paddock												
	heifers worked well through yards with only a few becoming slightly agitated when being mouthed but settled quickly when returned to the mob . this would be attributed to being pretested only 7 days prior														
Handled With	Aerial (Helicopters, gyro's and planes) , Bikes , On foot														
Assessor Comments	Buyers a good 4 deck line of 0 & 2 tooth PTE heifers showing good softness bone and length with depth of breeding. Heifers ideally suited to the heavy Trade feeder market, alternatively these heifers have the quality to retain in breeding operation as they have all come from very well regarded breeding herds in Western Queensland and have been running with VGQ Drensmaine blood Santa bulls until pretesting on the 20/6 where they fell out of Vendors calving window after very short joining There is good compensatory gains to be had as most are weaner mums and have had extensive handling in past 10 days . Please note 2 heifers noted with slight blue scarring in one eye not considered detrimental also several heifers observed with slight fly rub marks. Please note Vendor has another lot of 4 tooth sisters and 2 tooth Brahman cross heifers this sale and 12 decks same cows in Eastern states														
Assessor	Peter Elmes (Level 2 Accredited) Phone: 0428 666 546
