Vendor Comments	Steers are an annual turn off, which have a great temperament.

Temperament	Yards	Crush	Paddock
	Quiet: 24 head	Quiet: 24 head	Temperament not assessed in Paddock

Steers have a quiet temperament and were very easy to handle in the yards and in the crush. This could be attributed to being well educated at weaning time.

Handled With	Bikes , Dogs , Vehicles
Assessor Comments	Buyers an opportunity to purchase a good quality line of 24 steers that are best described as Angus cross types that present in store to forward store condition. The vendor has done a excellent job with these steers as they are very quiet to handle through the yards, which can been seen in the video. At the assessment it was noted some steers had some old rub marks around their eyes which have healed up and not detrimental. Four steers with either a partial white face or white on belly with the Angus /Droughtmaster cross types have a red fleck in their coats with 1 which has more of a brindle fleck. Steers are very tidy around the head with very little horn. In all, these steers are a good quality line which stand on good bone and depth with the potential to develop further. They will not disappoint. Please note there are another 15 heifers of the similar description in the same sale to help with trucking.
