Assessor Comments	Buyers an opportunity to purchase a good quality line of 15 Weaned Heifers that are best described as Angus cross types that present in store to forward store condition. The vendor has done an excellent job on educating these heifers as they are very quiet to handle through the yards, which can been seen in the video. At the assessment it was noted there was 1 heifer with a white feck on neck and under belly. The Angus /Droughtmaster cross types had a red fleck in their coats. Heifers are very tidy around the head. These heifers have a good bone and depth with the potential to develop into quality future breeders or for backgrounding. Heifers are bred out of a very good quality herd which are noted for their high fertility and will not disappoint any purchaser. Vendor has another 24 steers of similar description in the same sale to help with trucking.
