| Assessor Comments  | A good quality line of Angus and Angus x Weaners. All weaners were easy to flow through yards and are all up to date with health treatments. Steers were freshly ringed with sack still attached. One steer has a small white belly but all others observed to be straight black. Yard weaned 3 days prior to assessment none of these weaners were bellowing and will now go forward after being weaned. A good line of weaners suitable to be placed on crop of backgrounded. |                |                                     |
