Comment on Fat Score 1 Cattle	All score 1 cows are strong and fit to travel.
-------------------------------	--

Vendor Bred	No Vendor has owned stock for More than 12 months
Stock History	The majority of the cows were purchased with the property and are bred from a Droughtmaster base with Angus Bulls having been used over them for many years. The younger cows generally have a higher Angus content.
Lifetime Traceable	Unknown

Grazing Conditions	Light hayed off grass with some short green pick at the base, also scattered summer herbages. Cows are in great condition considering lighter feed conditions. Returned same
--------------------	---

Burr/Seed in Coat	No Burr or Seed of weeds declared noxious observed in the coats at assessment
-------------------	---

HGP Status	The owner declares that the cattle have not been treated with HGP at any period of their lives
------------	--

Vendor Comments	Turnoff of Cows that were purchased when the property was acquired.
-----------------	---

Joining Details	Station Mated - Continuously Joined Bull Breed(s): Angus		
Preg Tested?	Yes, this lot was pregnancy tested, by Michaela McClymont - Vet (Vet) on 29/06/2022. 33 Head (100%) PTIC, from 1 to 3 months (at time of assessment 29/06/2022). Certificate Available.		
Other Joining Details	The cows are continuously station mated to Angus Bulls purchased from Boshammers at Chinchilla (Sandon Glenoch Angus)		
Temperament	Yards	Crush	Paddock
	Docile: 4 head	Docile: 6 head	Temperament not assessed in Paddock
	Quiet: 27 head	Quiet: 24 head	
	Slightly Stirry: 2 head	Slightly Stirry: 3 head	
		The cows worked well through the yards and only one was noted as needing more space when handling. Generally the cows were calm and stood still in the crush.	
Handled With	Aerial (Helicopters, gyro's and planes) , Bikes , Vehicles		
Assessor Comments	Offering 33 Good Quality PTIC Angus Cross Cows. The cows averaged 575kg live at assessment after an overnight curfew. The cows are majority large frame cows with good bone as can be seen in the photos and from the weights recorded at assessment. They were Vet PTIC at assessment to be 1 to 3 months in calf and have been station mated to Sandon Glenoch Angus Bulls. The cows are originally bred from a Droughtmaster base with Angus Bulls being used over them for many years so the younger cows show a higher content of Angus. The cows are described as mixed age 4 - 14 years old but the majority of the cows are 8 years and older with age brands not identifiable on all cows. Please see age section for full age break up. Buyers these cows are a well presented line of large frame cows that will rear another calf for the potential purchaser and the younger cows amongst them will be great breeders to continue on. Please note 1 cow was noted with blight scarring on an eye and one with larger teats.
