	Temperament is key attribute at Spring Park and these heifers are no exception, a good line of Heifers well behaved in paddock when photos were taken. Heifers flowed well through yards as they are frequently getting weighed, health checked, pregnancy tested or getting health treatments. Heifers performed well in crush with only a small percentage becoming slightly stirry when being mouthed.

Assessor Comments	Another quality line of Angus heifers Spring Park are offering. 26 in total these heifers come from reputable backgrounds and are sired to good quality reputable sire bloodlines. Heifers were all easy to assess weigh and mouth in yards. Heifers have all been pregnancy tested and are 2 months to 7 months in calf. Light seed of Bathurst burr was observed in coat otherwise heifers are very clean and in good health. Please note one heifer had pink eye scarring but wasn't active heifer had good visual sight but noticeable scarring.Very good line of heifers to calve out with all heifers joined to a LBW bulls reducing chances of trouble in calving.
