Handled With	Very quite cattle to handle in the yards and paddock that flowed through the crush with minimal pressure & fuss. Bikes , On foot , Vehicles		
Assessor Comments	33 Very good quality 2nd calving Angus cows, PTIC to Angus bulls due to calve from the 28th of August for 7 weeks. These heifers have done & terrific job rearing their calves with them only being weaned late May. Since having the calves pulled off them they haven't had the opportunity to improve in conditon with them running on 5ft high phalaris along with some of the harshest winter conditions we have seen in the Tablelands. Given the right feed these cows will do nothing but jump out of their skin. These cows have the genetic potential to grow into front paddock cows, with the vendor taking great care when he purchased these as heifers. As seen in the scanning certificate 26/33 of these heifers joined in the 1st 3 weeks of joining which means they are in calf to Dalwhinnie Klooney P62.
