Assessor Comments	These large frame Landfall Angus blood PTIC cows that are faulty but would provide a good trade to calve down, fatten and split. Cows have plenty of weight and frame, weighing 658kg full (632-722kg) at assessment. These cows are being sold due to poor feet or udders (see media) but should all rear a calf and provide a return on the salvage value on the cow.
-------------------	---

They are in calf to LBW Landfall Angus Bulls and expected to calve September/October - note; five head are expected to calve in September and one identified as later (likely early to mid October). Cows were quiet to handle. Please note; vendor has two other lots in todays sale for a total of 26 PTIC females being offered.
