Joining Details	Not Station Mated		
Any Access To Bulls or Stags?	Yes, last access to bulls/stags: 30/07/2022		
Joining Access Details	Heifers have been exposed to bulls as followers on their mothers, however due to their age and weight they are unlikely to be cycling. No guarantees can ever be given here though.		
Temperament	Yards	Crush	Paddock
	Quiet: 120 head	Quiet: 120 head	Temperament not assessed in Paddock
	Heifers were very good to handle in all areas of the yards and also considered quiet when moving from yard to yard. In the crush they were generally quiet even whilst being fitted with an NLIS device. Generally, the temperament is not an issue at all. Buyers should be warned however, most cattle need to be settled down on arrival after a truck trip and in strange surroundings before they are shown the bush gate.		
Handled With	Aerial (Helicopters, gyro's and planes) , Bikes , Dogs		
Assessor Comments	Buyers, a 3-deck line of good quality soft flatback weaner heifers bred on light Ironbark forest type country. These heifers do not appear to have suffered any setbacks and have presented in good store condition so expected to really go ahead quickly on heavier country. I would expect these will provide excellent compensatory gain, they are not fresh and sappy and likely to melt after purchase. Most show adequate weight for age and length and would suit to use as future breeders. They will also suit backgrounders to take them through on either crop or improved pastures to heavier domestic feedlot entry weights. They do appear to be in very good health, very clear in the eye and no respiratory issues. Buyers in clean country be aware these will have had two plunge dips in preparation for entry to all tick free areas. Please note there is a line of steers in this sale from the same property. Repeat buyers are now operating and buying these cattle so the "proof is in the pudding".
