Cows flowed well through the yards and did have to come around twice at assessment. The odd cow stirred in smaller confined yards and crush but settled once back with the mob. Odd brahman cow is very protective of her calf but were never aggressive.

Assessor Comments	Buyers a line of 59 x 59 Brahman & Brahman X cows with absolute cracking calves at foot. Cows are best described as medium to large frame and in strong store to forward store condition. Cows range from 2 - 10 years with 76% of the line 6 years or younger. Calves are sired by predominantly Lawson & Sandon Glenoch Angus bulls & are thumpers averaging a very healthy 215kg at assessment with 65% weighing 180kg or better. Calves were marked in last 10 days and all look to be healing up well. There is about 6 cows that are not producing a lot of milk due to size of calf with calf possibly have half weaned it self. At assessment noticed 3 x cows with slightly worn teats but not busted. Cows present a great opportunity to fatten and split of preg test up for a trade.
