Cows good to muster in paddock. Worked through the yards on foot and drafted through a pound. All cows moved freely and recognized an open gate which they would move through quickly. Some cows became nervous in the crush however they settled quickly once returned to the mob.

Handled With	Bikes , Horses , On foot
Assessor Comments	Useful quality, predominantly Santa cross cows PTIC to Droughtmaster Bulls. Calving in good window. Big framed cows useful to calve out and still have significant value as a meatworks article. A lot of these cows have recently had weaners removed. There are six cows with hip damage with one showing an altered gait due to this, these are old injuries which doesn't seem to have affected their ability to calve or do well . There are three cows with wry noses and one with a slightly crooked outlook, once again this doesn't appear to affect them.
