Assessor Comments	23 Droughtmaster cross heifers averaging 355kg at assessment. These heifers are doing well on hayed off native pasture with a fresh pick coming through. They are in predominantly store to forward store condition and are maturing into handy heifers. They were joined to selected heifer bulls from 'MOOGENILLA' Angus stud on the 16/3. They were preg tested from 2-4 months by Mark Adams at assessment. These heifers are a nice line of soft feminine females that will continue to grow into reliable cows given the opportunity. Buy with confidence.
