	Slightly Stirry: 9 head		Slightly Stirry: 17 head					
	Steers were a pleasure to handle through the yards, odd steer baulked going into the weigh box or exited the headbail after mouthing briskly, neither of which would be considered unexpected. after assessment Steers stood quietly and calmly for photos and in many instances needed to be moved away from the camera. walked out after assessment easily with 2 men on motorbikes.							
Handled With	Aerial (Helicopters, gyro's and planes) , Bikes , Dogs , On foot , Vehicles							
Assessor Comments	4 decks of predominately Higher content Brahman backgrounder steers. temperament is spot on with these boys handling very well through the yards and easily let out after assessment, it is not hard to see the education these boys have received. Core Breeding herd is made up of predominately pluto & Chatfield Brahman genetics with a mixture of Drensmaine and canowindra Santas, Rondel Droughtmasters, 5-Star Senepol/Charolais cross throughout. 30hd of #1 and heavier steers mouthed with all 30 being milk tooth. 100% weighed at assessment after 4 hrs off feed and water 330-460kg full weight to average 387 full weight at assessment. these steers received 5mm of rain on them 2 days prior to assessment and have been in a holding paddock until assessment. would expect these steers to quickly regain any lost weight and as such may be slightly heavier at delivery. Vendors have another 3 decks of crossbred steers in this sale and would like to deliver both lots at the same time.
