Assessor Comments: Buyers have the opportunity to pick up an excellent line of 88 Maderty Angus bred Heifers .The Heifers have been Bred to become breeding replacements ,but also to perform in the feedlot .There are several within the mob that have eye clouding , it is not considered detrimental to the health of the animal . The heifers have some ringworm as evidenced in photos, I would expect that this will heal as spring progresses. The heifers will be split into two lines 44 . their Sisters 88 in total , are in the same sale they will be delivered as a run out the gate by the Agent first ,44 through will be loaded first. One heifer has a small seed lump under her Jaw but of no issue. Please note delivery although left till the later part of next week may become an issue if persistent rain continues.
