Handled With	Bikes , Dogs , Horses , On foot , Vehicles
Assessor Comments	19 milk tooth Angus heifers 14 to 17 months of age. All heifers PTE with the weight not a true representation of their maturity and present with a massive amount of compensatory gain. Heifers were joined through the cold wet winter months running on native country. One heifer with blue eye on off side has no affect on vision. One heifer with white on the navel and udder but does not extend all the way between the two. Breed or feed these heifers will bounce in the Spring.
