Assessor Comments	Buyers here is a small line of mostly large frame Charbray cows PTIC to good quality stud Angus bulls. A portion of these cows have just had weaners taken off them hence some still slightly bagged up. Vendor preg tests cows each year with the empties being moved on. Plenty of volume in these cows with the average weight at assessment being 643 kg. These good quality large frame functional cows would be a good addition to a breeder herd or calve down and rejoin to a bull off your own choice. Please note 1 cow noticed to have small lump on cheek and another cow having a small scab above ear from horn being removed previously, neither blemishes deemed to be detrimental. Cows will load comfortably on one deck.
