Assessor Comments	22x22 10-12 year old cows with sappy calves at foot. These cows averaged 562kg at assessment (6 hours off feed). They have been running on an awesome paddock of mixed Tropical, Lucerne, Clovers & Oats and have great fat cover. They should go on to rare this calf, with the option left to the buyer to either kill cow or get another calf. These cows have been very good for the vendor, producing calves every year since the age of 2, even surviving through the drought. Did not mouth cows at assessment, just relied on fire brand and ear tag for age. Please note the cows have been used in vendors AI program, eliminating them for EU status. However the calves can stay in the EU system. 6 cows seen with slight blue eye, at least 6 seen with white on the udder, there is 1 blue baldy and 1 calf is a black baldy. 1 cow has had lump under her jaw and has lanced and healed. There are about 3 calves closer to 3 months old the remainder are fresh to 1 month.
