| Vendor Comments    | Annual turnoff of weaner steers, have done very well on their mothers and will continue to grow into heavy feeders and bullocks. Best line of weaner steers that I have bred.                                                                                                                                                                                                                                                                                                                                                                                                                                              |     |                          |     |                             |     |

| Assessor Comments  | This is a quality line of Angus & Brangus cross steers that are very heavy boned, deep steers with plenty of length and growth. They were assed full being on hay and water, but were only off their mothers for 24hrs. They were 224 to 399 at assessment to average 305kg (full) and 289kg with the 5% delivery adjustment. The steers are predominately black with a percentage of grey, brindles and a couple of reds through the mob. The Gydia Park steers carry a good reputation as cattle that will preform. Please note the 79 steers will need to load over 2.5 decks as they are too growthy to fit on 2 decks |     |                          |     |                             |     |
