| Assessor Comments           | Well bred Bogo blood wether lambs that represent the top 1230 of 2000 lambs. Lambs show all the attributes and potential to make all kill specs. Lambs have been and are currently running at 43 DSE Per Ha hence will really perform in a feedlot or at a lesser stocking rate on high protein feed. Generally deep bodied lambs with muscle. Maturity rates on these lambs gives time before teeth become prominent. With a better than 2 inch skin lambs will give a good wool return. |
| Assessor                    | <b>Phill Butt (Level 1 Accredited)</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
